# WELCOME

The 2015 Swim Season commences on St Patrick's Day, Tuesday March 17th at 2pm at the Slip. Our summer programme starts a little later on May 21st. The season this year consists of 8 swims in the World Series, a return of the midnight swim in July and our annual Tralee (Blennerville) to Fenit Challenge in late August/September. As usual there will be several barbeques, swim lessons and water safety classes along with a triathlon running in Fenit in late August. We have two hugely popular swims hosted by our Ballyheigue members later in the summer. We round off the season with the Swimmer of the Year presentation at our club night out in late September (date and venue to be confirmed). Come along for what promises to be a great 2015 swim season.

## Brief Explanation of Tides and Tide Tables

The gravitational pull of the moon and the sun control the tides.  
When the moon and sun are aligned, their gravitational pull is combined.  
This causes spring tides  
When the moon is at the quarter, the tide will move less water.  
This is when neap tides occur.

### SPRING TIDES

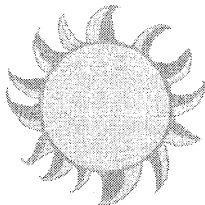

At the full and new moons, when the moon and sun are in line with the earth, the gravitational pull they exert combines, giving very high tides and equally very low tides. These greater tides are called spring tides.

## NEAP TIDES

At the quarter moons, when the moon and sun are at right angles to the earth, the gravitational pull they exert is not aligned, giving less extreme high and low tides. These smaller tides are called neap tides.

### The weather can affect the tides

Strong winds can hold the tide in or push the tide out.  
Wind and pressure can cause variations from predictions.
